

Afzal Karim's wildlife photography exhibition receives huge response

-A Monitor Report

Date: 16 March, 2023

Dhaka : On World Wildlife Day, renowned photographer Afzal Karim organised his second solo wildlife photography exhibition named Life in the Wild where he exhibited 93 beautiful photos of wildlife, nature and birds from our country as well as abroad.

The three-day long exhibition took place at the capital's Gallery Chitrak from March 3-5, 2023, visited by several photography, art and nature enthusiasts.

Nature is made of wildlife, plants and many other elements of environment. People's incognisance towards wildlife are putting them at risk and leading them towards extinction. Hence, nature is suffering from an imbalance.

Therefore, to protect wildlife and raise awareness among people, photographer Afzal Karim organised this exhibition.

"We now see the youth suffering from severe depression. To prevent it, they should get more involved with nature and wildlife. They will be content taking photographs of beautiful wildlife and birds that our nature blesses us with," said Afzal Karim.

The dignitaries who attended the exhibition also urged everyone to work together in increasing awareness to protect the environment, nature and wildlife.
